

**Workshop Description:** Mobius Radial is a wall hanging made using paper piecing, curved piecing, and partial seam techniques. This workshop covers the basic concepts of paper piecing on an arc, curved piecing, and precision piecing. We will also discuss quilting ideas. Students will learn the concepts of paper piecing on a curve. There will be a focus on curved piecing and partial seam construction. The students will complete a portion of the quilt during class. The Mobius Radial Quilt finishes at 30 x 30 inches.

**Fabric Requirements:**

This quilt is made from two high contrast colors; the fabric amounts below are estimates:

Fabric Requirements <sup>1</sup>		
Quilt Template	Fabric Amount	Kona Color Reference
Outer Background & Center Background <sup>2</sup>	1 yard	Snow
Pieced Arc - Feature Fabric	3/4 yard	Charcoal
Pieced Arc - Background Fabric <sup>2</sup>	3/4 yard	Snow
Quilt Backing	1 1/8 yards	Snow
Quilt Binding / Facing	3/8 yard	Snow
Quilt Batting	38 x 38 inch	N/A

<sup>1</sup> Pattern assumes yardage is 42" wide and seam allowance of 1/4 inch. Please note, these are fabric estimates.

<sup>2</sup> The background fabric measurements are given in two different cuts intentionally.

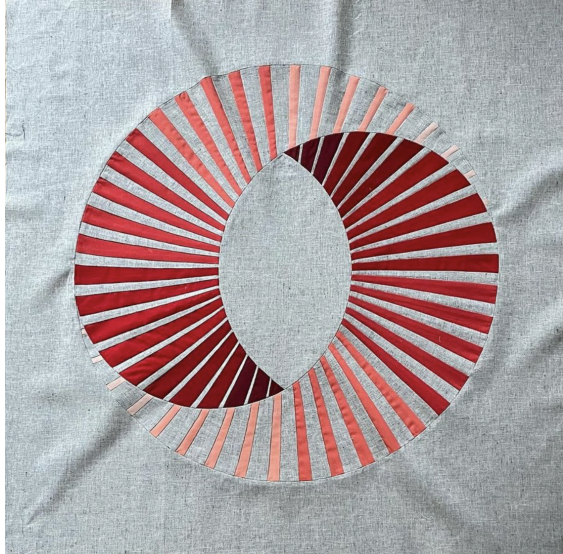

**Supplies:**

- **Mobius Radial Quilt Pattern** - Digital download available on [www.CottonandBourbon.com](http://www.CottonandBourbon.com)
- **Fabrics:** There are only two fabrics required for this quilt! We will spend time in class piecing the arcs, so the backing, binding, and batting isn't required for class. Some makers have used a gradation within the arc for fantastic results. Check out this hashtag on Instagram to see examples: [#mobiusradialquilt](https://www.instagram.com/mobiusradialquilt) There are two examples of using gradations for this quilt below (on page 2).
- Sewing Machine & Basic Sewing Supplies, Iron, Add-a-Quarter Ruler, Clear Tape, Rotary Cutter, Mat, 6 x 24 inch ruler, Fine Glass Head Pins, Sewing Machine with 1/4 inch Foot, Neutral Piecing Thread, Cut Resistant Glove, Pattern Weights

Link for cut resistant glove: [click here](#)

Link for pattern weights: [click here](#) (I'll also have these in the classroom)

You can source the fabrics from your stash, a local shop, or online fabric shop - [sewfinity.com](http://sewfinity.com) is an independently owned fabric shop and my fav for sourcing solids!

We'll be using the Swoop Quilt Block to demonstrate and practice curved partial seams in class. Please see below for the fabric remnants needed for this test block. These can easily be selected from the remnant bin. An example block is pictured to the right. This block is made with two feature fabrics (wasabi and glacier) and background fabric (snow).

Swoop Quilt Block Fabric Requirements		
Quilt Template	Minimum Fabric Amount	Kona Color Reference
Outer Background & Center Background	17 x 17 inch remnant	Snow
Swoop 1 & 2 - Feature Fabrics	2 - 12 x 13 inch remnants	Wasabi & Glacier

**Workshop Prework:**

1. Select fabrics for the Mobius Radial quilt & Swoop Quilt Block class exercise
  - a. Reminder: the Swoop Quilt Block is a partial seam class exercise - fabric selection should be quick and easy!
2. Print the pattern instructions and bring them to class. **You do not need to print the pattern template pages** - these will be printed for you and available in class for a \$5 fee. (This just covers my cost for printing.) By using the provided templates, you don't have to worry about taping together pattern templates or having any printing scale issues. There is no need for a lightbox for class since we won't have templates to tape together.
3. **Cutting fabric before class is not necessary or recommended.**
